

Sprint 4 Report

Product: Recipe Retriever

Team Name: RexFetch

Members: Kim Ho, Vyankatesh Nandapurkar, Jackson Kohls,
Kevin Yosifov, Prithvi Arunshankar

Date: 06/06/2023

Actions to Stop Doing:

1. We should stop interjecting in other people's work (As it's the final week, this led to more panic about not being able to finish and some people accidentally did work that someone else was working on, essentially stepping on their toes. Better communication would fix this.)

Actions to Start Doing:

1. We should communicate more as a group by taking actions to make more stand-up meetings and making sure that we know what everybody is doing for the project.
2. If team members are unable to complete their work, they should tell the Scrum Master or Product Owner why they are unable to finish their tasks. Also this can help as the Scrum Master/Product Owner can assign somebody else to the task to make sure it gets done if it is integral to the project or integral to the next Sprint.

Actions to Keep Doing:

1. We should keep track of our tasks with Trello and assign ourselves work from there. It has been very helpful toward the organization of our team.
2. We should keep communicating about things we are confused about with our other team members.
3. We should keep up our meetings as we have now done more meetings as it is the final stretch and wanted to make sure that the MVP was viable.

Work Completed/Not Completed:

Task Lists:

User Story 1: As a user, I want to look up a recipe based on the ingredients in my kitchen.
(MVP)

1. Set up recipe API calls and parsing the recipe data into the outgoing JSON format that is described in the communication_docs.md or backend_doc.md [Complete]
2. Backend to frontend communication (implements http requests from server to app) [Complete]
3. Frontend to backend communication (implements http requests from app to server) [Complete]

User Story 2: As a user, I want an easy to use app with cool features.

1. Set up user database and integrate with server [Complete]
2. Front end changes [Complete]
 - a. Allow user to “choose” a specific recipe [Complete]
 - b. Create a Filtering Function [Complete]

Work Completion Rate:

- Total number of user stories completed: 2 of 2
- Estimated ideal work hours spent:

User Story 1: As a user, I want to look up a recipe based on the ingredients in my kitchen.
(MVP)

- 100% Complete

User Story 2: As a user, I want an easy to use app with cool features.

- 100% Complete
